Bengaluru, Karnataka, India

## About Me

Mustapha is a self-taught tech enthusiast with diverse skills in web development, UI/UX design and testing, programming and coding, and a keen interest in learning new things. He is highly passionate about cybersecurity and computer networking.

In a nutshell, He is a Motivated Software Developer with a passion for various languages and technologies. I highly dedicate myself to delivering scalable software, clean code, and user-friendly software. My ambition is to bridge the gaps by bringing design into the world of coding. Apart from that, I also help people fix their bugs in various coding environments or by teaching them how to write code.

My dream has always been to set goals and work towards them to be the most successful in the technological world of computing.

## Experience

### Tashiba Consult Limited Zaria, Nigeria

2019 - 2020

Student Industrial Working Experience Scheme (SIWES)

I completed my four months student Industrial Working Experience Scheme (SIWES) from 4th November 2019 to 21st February 2020 with Tashiba Consult Limited, Zaria.

### Human Resource and Management (NBAIS) Zaria, Nigeria

2021 - 2022

Student Industrial Working Experience Scheme (SIWES)

I completed my one-year's student Industrial Working Experience Scheme (SIWES) from 16th August 2021 to 18th July 2022 with Human Resource and Management (NBAIS).

## Education

### Bachelor of Computer Application

2022 - 2025 Gandhi Institute of Technology and Management (GITAM University)

As a BCA student at GITAM University, I am taught the fundamentals of computer science and software by extremely capable and supportive professors. The curriculum covers an array of topics, and I am highly encouraged to participate in activities that promote soft skill development, club participation, venture development, sports, and other extracurricular hobbies. Additionally,

- I received the SII scholarship to pursue my undergraduate degree in India.

### National Diploma in Computer Science

2019 - 2021 Nuhu Bamalli Polytechnic, Zaria

I learned computer science at Nuhu Bamalli Polytechnic. The programme curriculum includes programming languages (Python, C++, Javascript, Java, and PHP), information technology, operating system fundamentals, web technologies, data structures, and data communication and networking.

Additionally,

I am dedicated to using my talents and experience to help the organisation expand, to influence good thinking in people's lives, and to contribute value to humanity all around the world.

### Junior and Higher Secondary School

2015 - 2018 Lawal Aliyu Academy, Zaria - Kaduna, Nigeria.

2007 - 2013

Al-Huda Centre for Islamic and Science Education.

I studied science subjects, including Information Technology, Physics, Mathematics, Biology, and Chemistry. While for my Junior and Primary Education, I was a student at Al-Huda Centre for Islamic and Science Education.

## Community Activities

### CodeX Club · GITAM University

Member (August 2022 - Present)

CodeX is a student-run club for coding and all things technology at GITAM University. As a core member of the club, I am responsible for helping students of GITAM to develop their technical skills and cybersecurity tools and technologies through workshops, events, and development sessions. I am also responsible for handling projects related to the club.

## Directorate of student life · GITAM University

Student Life Associate (June 2023 - Present)

As a Student Life Associate at GITAM University, I enhance the student experience and contribute to their personal and academic growth. I work closely with students, faculty, and staff to organize and coordinate various events, workshops, and activities to promote student engagement, well-being, and development.

### Projects

2020 - present

COMPUTERIZED SUG PAYMENT SYSTEM

Nowadays, the use of computers is expanding in all areas. As it facilitated immense information dissemination and communication. It reduces time and energy and gives the correct information and records to an organisation. That is why this project deals with the computerised payment of student union government (SUG) fees to make the payment process easy and effective within a very short period of time. and the other projects are Calculator, Sandwich, Oneshoot, Digital Media, and many more.
